KNOTT

KNOTT COMPONENTS

KNOTT is one of the worlds largest trailer component manufacturers, and unlike most, they offer complete systems with accessories and spares to match.

Originally started in Germany, KNOTT designs and manufactures from plants across Europe and North America. The components meet and often exceed European safety standards.

EASY HUB

THE EASY HUB ADVANTAGE

CAR BEARING TECHNOLOGY APPLIED TO TRAILERS

No maintenance, and no greasing for a fuss free build and ownership.

- Stainless & waterproof version, or waterproof only
- Sealed-for-life bearing to ensure extended usage time
- European design and manufacture

EASY AND CONVENIENT

TRAILER KITS are the most convenient way to source the key parts you need for your trailer build, either for a one-off job or in a manufacturing production line. Have confidence that all the components you need work together, have been tested over time together, and are delivered together. The convenience of a kit makes for a simpler, faster, stress-free trailer build.

With over 40 years' experience in trailer components and wheels, Treadway has become a trusted partner in the supply chain of many manufacturers.

Talk to us about how we can help you with your trailer build.

*GVM - Gross Vehicle Mass, the maximum weight the trailer can weigh fully loaded including the weight of the trailer itself.
