

➤ TANDEM AXLE TRAILER KIT

IDEAL FOR manufacture of road trailers for larger heavier loads like digger trailers, car transporters, and livestock trailers. Add corner steadies for extra stability when parked.

2700kg Tandem Axle with Drum Brakes

Kit: TB270013

All the key components for manufacturing a sprung tandem axle trailer with drum brakes for road use. Suitable for loads of up to 2700kg GVM*.

Comes with inertia controlled braking system that removes the need to get out of the cab and adjust the trailer before reversing. Add corner steadies for extra stability when parked.

- Delivered in one package ready for use
- EASY HUB no mess low maintenance bearing system
- Smooth braking performance
- Robust and reliable Knott coupling and jockey wheel
- No hydraulics
- No exemption required
- No electrics & batteries required
- Tried and trusted components
- 13" Rim

1	Pair LED Trailer Lighting Sidemarker Lights Amber	1	Brake cable holder tandem to suit KNOTT 3500kg kits
4	Axle plate to suit 50mm axle		

KNOTT

KNOTT COMPONENTS

KNOTT is one of the worlds largest trailer component manufacturers, and unlike most, they offer complete systems with accessories and spares to match.

Originally started in Germany, KNOTT designs and manufactures from plants across Europe and North America. The components meet and often exceed European safety standards.

EASY HUB

THE EASY HUB ADVANTAGE

CAR BEARING TECHNOLOGY APPLIED TO TRAILERS

No maintenance, and no greasing for a fuss free build and ownership.

- Stainless & waterproof version, or waterproof only
- Sealed-for-life bearing to ensure extended usage time
- European design and manufacture

EASY AND CONVENIENT

TRAILER KITS are the most convenient way to source the key parts you need for your trailer build, either for a one-off job or in a manufacturing production line. Have confidence that all the components you need work together, have been tested over time together, and are delivered together. The convenience of a kit makes for a simpler, faster, stress-free trailer build.

With over 40 years' experience in trailer components and wheels, Treadway has become a trusted partner in the supply chain of many manufacturers.

Talk to us about how we can help you with your trailer build.

*GVM - Gross Vehicle Mass, the maximum weight the trailer can weigh fully loaded including the weight of the trailer itself.
